

Rocketseed Signature Manager for MS Outlook

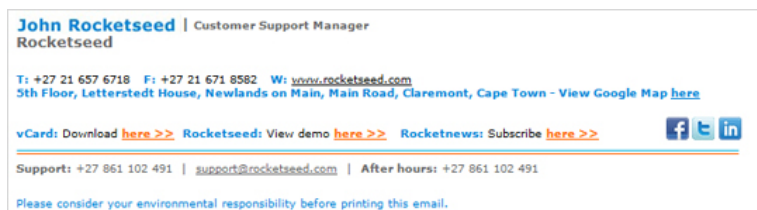

Email 2.0 is the next generation of email and Rocketseed 21st Century technology delivers this new platform through its intelligent software and provides the platform for **Rocketseed Mail** and must-have modules such as Rocketseed Signature Manager.

Standardised Signatures:

A company's brand image is one of the defining elements in the eye of the customer. With the average employee sending 15,000 emails per annum, a standardised corporate email signature is one of the most significant steps an organization can take toward achieving brand superiority.

Protect your Corporate Image:

It is difficult to maintain your organization's corporate image when Outlook users are able to apply a variety of HTML signatures and stationary when replying or forwarding email. Rocketseed Signature Manager gives you back the control, ensuring that signatures comply with corporate standards and that senders' contact detail remains correct at all times. Rocketseed Signature Manager is a way to create and manage professional looking signatures in MS Outlook.

Benefits of using Rocketseed Signature Manager:

- Works in conjunction with Rocketseed Mail to provide compelling marketing messages, professional signatures and legal disclaimers to your organization's email.
- Signatures are rendered correctly on any device that supports HTML including iPhone, Blackberry, tablet PCs and web mail.
- Signatures can comprise of text of any web safe font, format, colour and size. Signatures can also include images and links.
- Works on every email composed within the organization, for both internal and external emails sent.
- Rocketseed Signature Manager works with Microsoft Active Directory and updates automatically every time the user logs on by synching with Active Directory.
- No installation on Exchange Server required.
- Centrally controlled and deployed to every sender within the organization, overriding any existing stationary.
- Compatible with all versions of Outlook 2003 and later.

Do you:

- Want every email sender in your organization to use consistent professional signatures?
- Want to be able to create a different signature for different business units or groups or people in your organization?
- Want to be able to manage this centrally and automatically deploy the signatures to all senders?
- Want to be able to personalize each sender's signature by inserting information from Active Directory?
- Want to use Outlook's built-in signature feature, but don't want to install anything on your Exchange Server?

Together with **Rocketseed Mail**, Signature Manager provides businesses with a comprehensive marketing solution with every email composed by every individual within the organization, ensuring accurate, professional looking email signatures on internal and external emails.
